ACTIVITIES

At the age of 7 I created my first superhero for a comic book series which started the lifelong love of drawing and story writing.

At 11 I began selling comics I created to kids at school who loved them. In my spare time I draw, write story lines for future novels, and write notes and bios of characters I've yet to create.

Most importantly – I love gaming! :) I've decided I'd like to be a Video Game Designer when I leave school, so when I'm not enjoying one of my other hobbies, you can find me learning and creating code!

I have been involved in footy, swimming, cricket, kick boxing, and Judo in the past, but have been more focused on my studies, hobbies, and work in 2026.

I have been babysitting my younger sister for 7 years now, my parents say that I am responsible and mature for my age.
